

# Sunbeam Franchise Opportunities

Your world, Powered by Sunbeam™

Be among the first Dealers in history to offer not only a terrific vehicle - but the tools for self reliance and independence. Only a Sunbeam Dealer can offer their customers the ability to completely illuminate their transportation, fuel, and home electric costs.

## Sunbeam PowerPorts™

Believe it or not, a Sunbeam PowerPort™ can not only generate enough electrical power recharge an electric car or truck, but it can also run an entire home. In fact, a small PowerPort™, similar to the size shown on our home page, has the ability to completely power over 70% of the average sized home built in America.

How much does a PowerPort™ cost? Many times, the monthly payment of our PowerPort™ is less than the customer's average monthly electric bill – and when they move, they can take it with them.

Sunbeam PowerPorts™; beautiful, portable, powerful.

For the first time in history, a customer can actually purchase strait-away or trade their car in for their own “*electric power plant*”. Combine this with a Sunbeam electric vehicle and your customer can live and drive completely under their own power.

## Sunbeam Vans and Trucks

Currently, Sunbeam is focused and committed to continued design and production of pure electric Vans and trucks for farms ranches, campus and specialty markets. Our “task oriented” vehicles with proven performance provide unique solutions to an ever growing market un-approached by other franchises.

## Sunbeam MotoBikes™

One of the fastest growing markets in the world includes transportation solutions to commuters, bikers, health and recreation markets. Offering the fastest acceleration and cruising speeds up to an incredible 30 MPH, Sunbeam MotoBikes™ surpass performance of any other production bikes on the road. Combined with our exclusive Solar Hybrid option, Sunbeam owners can commute up to 20 miles without pedaling purely from the power of the sun!
